

Piraeus 04th July 2019**TO WHOM IT MAY CONCERN****RE: MESSRS FUTURE CARE**

Dear Sirs,

In the three years that our fleet have used Future Care to manage our crewmembers' medical response and medical costs onboard ship and on shore, I have been very pleased with their performance. Future Care's telemedical services have effectively lowered the number of medical appointments our crew need at shore. Their doctors provide excellent remote medical advice and most of our cases are successfully resolved by Future Care's physicians onboard the vessel, without the need to incur the time and expense of a shoreside medical visit.

Additionally, in case of further shoreside medical treatment, hospitalization etc, their follow up , their professional responsibility is prudently , duly and more than excellent, expressed.

I sincerely recommend Future Care's medical and cost containment services to shipowners in Greece and around the world.

Respectfully

Capt George Tsouris
Operations Manager
Deputy DPA-CSO
